Founded by a former employee of Whale Communications & Microsoft, we have experience deploying and upgrading IAG's and e-Gap's in leading companies around the world since 2002.

No other IAG services provider in the world has the level of IAG experience and expertise that we do!

## IAG Administrator Training Course

### Course Overview

The IAG Administrator course provides students with an understanding of the IAG product and features. The course leads students through a series of hands-on exercises in configuration, testing, and troubleshooting of application gateway environments.

The course covers all aspects of product administration and customization to ensure preparedness for various real world environments.

### Who Should Take This Course?

Application gateway deployments involve multiple IT disciplines, therefore MBR recommends that IT managers/administrators from the following areas take this class:

- » Networking
- » Security
- » Application administration
- » Helpdesk Managers

### Who Teaches This Class?

Classes are delivered by MBR consultants who are highly IAG experienced and 100% IAG focused. Their vast field-experience allows them to apply real-world knowledge to the training sessions. Areas of trainer expertise include not only IAG planning and configuration, but also firewalls & VPN, authentication, and encryption.

### Location and Travel

Training takes place at a NYC training center located at 71 W 23<sup>rd</sup> St. MBR recommends that training attendees stay at a hotel in Manhattan. Further, MBR recommends no rental car as subways & taxis are reliable and abundant.

### Schedule and Cost

Class is scheduled for August 12<sup>th</sup> thru 15<sup>th</sup>. Will typically run 9am - 5pm, but will start at 10am first day and end a little early on last day to allow for travel. Cost per seat is \$2195.
